

Our ergonomic arm supports are designed to provide comfort and stability. We offer a wide range of different shapes and styles to accommodate your individual needs.

Ergonomic Arm Trough

Featuring a unique cut out at the elbow, users have the flexibility of various arm positions. Made of moulded, skinned polyurethane, it fits the natural arm curvature and the triple track extrusion allows a variety of mounting positions/angles.

Ergonomic Hand Pad Kit

Fits to the ergonomic arm trough and provides a flat surface for the hand and fingers, providing support in a neutral & relaxed position.

Lateral Posterior Arm Supports

Provides a lateral & posterior block to encourage the client's arms to be positioned neutrally & to discourage extension. Featuring a removable padded cover made of dartex inside and durable vinyl on the outside, this support can be made to your specific dimensions.

Please quote width x depth x height at back x height at front when ordering.

Product details
